The FLIR DM284 Imaging Multimeter with IGM is a professional, all-in-one True RMS digital multimeter and thermal imager that can show you exactly where an electrical problem is to speed up troubleshooting. Featuring Infrared Guided Measurement (IGM) technology powered by a built-in 160x120 FLIR thermal imager, the DM284 visually guides you to the precise location of an electrical problem, helping you pinpoint hot spots faster and more efficiently. IGM enables you to scan panels, connectors, and wires without requiring any direct contact — so you can do your job from a safe distance. Once you find an issue with IGM, the DM284 can verify and confirm findings with advanced contact measurement features to help solve the most complex electrical issues. Ideal for field electronics, commercial electric, light industrial, field service, and HVAC work.
